

High Precision Medical Imaging Health Checkup-Package A NT\$ 164,820

Category	Item	Description
Standard Health Checkup	Standard Health Checkup	Physical check-up, ECG, Arterial Stiffness Index, ABI (Peripheral artery Examination), Pulmonary function test, Ophthalmologic exam, ENT exam, Fiber Rhinolaryngoscopy, Urinalysis, Gynecologic exam, and Pap smear.
Cancer Screening	Head & Neck MRI	Including cerebrum, cerebellum, brain stem, orbit, nasopharynx, ears and neck.
	Upper Abdomen MR	Including upper abdominal organs, such as liver, gallbladder, bile duct, spleen, pancreas, and kidneys.
	Pelvis MRI	Including retroperitoneum, pelvic organs, including prostate, urinary bladder for males; uterus, cervix and ovaries for females.
	Whole Spine MRI	Including cervical, thoracic, lumbosacral spine.
Cerebrovascular MR Angiography	Cerebrovascular MR Angiography	Including intra- and extra-cranial carotid and vertebral arteries for early detection for stroke, intracranial aneurysm and vascular anomalies.
Low-dose Computed Tomography(CT)	Low-dose Lung CT	High-speed, low-dose CT for early detection of lung cancer.
	Coronary Artery Calcium Score (CAC score)	An index for evaluation of atherosclerosis of coronary arteries.
Fat Quantitation of Liver MRI (For Male)	Fat Quantitation of Liver MRI (For Male)	An index for evaluation of fatty liver and non-alcoholic steatotic hepatitis (NASH).
Breast MRI & US (For Female)	Breast MRI	Dynamic breast MRI and ultrasound, for early detection of breast cancer.
	Breast Ultrasound	
High Resolution Doppler Ultrasonography	High Resolution Doppler Ultrasonography	High resolution ultrasound to screen thyroid gland, carotid arteries, whole abdomen and pelvis.
iDXA Bone Mineral Density (BMD)	iDXA Bone Mineral Density (BMD)	To check Bone Mineral Density and body composition analysis.
Body Composition Analysis	Body Composition Analysis	
Autonomic Nervous System Test	Autonomic Nervous System Test	HRV (Heart rate variability), for evaluation of autonomic nervous system.

High Precision Medical Imaging Health Checkup-Package A NT\$ 164,820

Category	Item	Description
Functional Medicine	Female Hormone Profile	Examine the hormonal balance of females, including LH (luteinizing hormone), FSH (follicle-stimulating hormone), estrone, estradiol, estrinol, progesterone, DHEA-S (dehydroepiandrosterone sulfate), SHBG (sex hormone-binding globulin) and free testosterone.
	Male Hormone Profile	Examine the hormonal balance of males, including LH (luteinizing hormone), FSH (follicle-stimulating hormone), estrone, estradiol, estrinol, progesterone, DHEA-S (dehydroepiandrosterone sulfate), SHBG (sex hormone-binding globulin), free testosterone and DHT (dihydrotestosterone).
Full Set of Blood Test	Full Set of Blood Test	Blood routine (CBC/DC), glucose AC (AC), glycated hemoglobin (HbA1C), risk factors of cardiovascular disease (T. Cholesterol), triglyceride (TG), High-density lipoprotein (HDL), total cholesterol and High-density lipoprotein ration (TC/HDL), low-density lipoprotein (LDL) and high sensitivity C-reactive protein (HS-CRP), kidney function test (BUN and creatinine), uric acid, liver and gallbladder function test, glutamate oxaloacetate transaminase (GOT), glutamic propylic transaminase (GPT), total bilirubin, γ -GT (gamma-GT), albumin, alkaline phosphatase (ALK-P), hepatitis screening (hepatitis B surface antigen (HBsAg), hepatitis B surface antibody (Anti-HBs) and anti-hepatitis C virus antibody (anti-HCV Ab)), thyroid function test (thyroid-stimulating hormone (TSH), free thyroxine (free T4), tumor marker (carcinoembryonic antigen (CEA), tumor marker for viral hepatitis and liver cancer marker (alpha-fetoprotein (AFP)), prostatic specific antigen (PSA) (males) and tumor marker for ovarian cancer (CA125) (female)), tumor marker for pancreas cancer (CA199).
